

NAPOMENA:  
- Svi temelji su od armiranog betona MB 30  
- Ispod temeljnih stopa izlazi podloga od mlaćevog betona MB 10, debljine d=5cm  
- Prostor između donje kote parapetne grede i gornje kote temeljne stope podbežnirati  
- Sve prodore uraditi prema detaljima armature i u skladu sa projektna instalacija, bez nainadnog štampanja i probijanja otvora  
- Betoniranje izvršiti tek po pregledu armature i odobrenju nadzornog organa

NOTE:  
- All foundations are made from reinforced concrete  
- Under foundations make 5cm thick binding with un-reinforced concrete MB 10  
- Concreting under ground beams to foundation footings  
- All breakthroughs are to be done according to reinforcement details and installation design, without additional chase cutting and perforation  
- All measures must be controlled on site  
- Concrete works are to be carried out only after reinforcements have been checked and supervisor's approval
